

The Ultimate Visitor Management Buyer's Guide

How to improve security,
compliance and front desk
efficiency

Stronger
Security

Better
Compliance

Operational
Efficiency

Better Visitor
Experience

Still using paper logs or basic sign-in systems?

Most organisations don't realise the risk until it's too late.

No real-time visibility of who's on-site

No reliable evacuation list

No audit trail for compliance

Manual processes slowing down reception

There's a smarter way.

What's really at stake

Security risk

Unknown people on-site

Compliance gaps

No digital records

Operational inefficiency

Wasted admin time

Poor visitor experience

Slow, outdated check-ins

If you can't see who's in your building right now - you're exposed.

What a modern system should include

- ✓ Real-time visitor, staff and contractor tracking
- ✓ Instant notifications when someone arrives
- ✓ Digital sign-in with photo capture
- ✓ Automated evacuation lists
- ✓ Pre-registration for faster check-ins
- ✓ QR code or kiosk-based sign-in
- ✓ Secure data storage and reporting

Operational & Productivity Savings

Organisations moving from paper sign-in books to digital visitor management systems often experience significant improvements in efficiency, compliance and administrative workload reduction.

Typical benefits can include:

Up to

80%

faster visitor check-ins

Up to

60%

reduction in manual reception admin

Up to

90%

less paper-based visitor processing

Faster

emergency evacuation visibility

Automated

host notifications and visitor workflows

Typical annual operational savings:

Small offices

AUD

\$6,000 - \$18,000
annually

Medium businesses

AUD

\$20,000 - \$60,000+
annually

Large enterprise or government environments

AUD

\$50,000 - \$250,000+
annually

Many organisations find that a digital visitor management system can **pay for itself within 1-6 months** when replacing manual reception and visitor tracking processes.

Common mistakes to avoid

- ✘ Choosing based on price alone
- ✘ Systems with slow or no support
- ✘ No evacuation or emergency features
- ✘ Complicated setup for staff
- ✘ Locked contracts with no flexibility

Simple rule:

If it's hard to use, it won't get used

Buyer's checklist

Use this before you choose a system

- Can I see everyone on-site in real time?
- Can I generate an evacuation list instantly?
- Is the sign-in process fast and simple?
- Does it support staff and contractors too?
- Can visitors pre-register?
- Does it work on iPad or Android kiosks?
- Is support fast and reliable?
- Is pricing transparent and flexible?

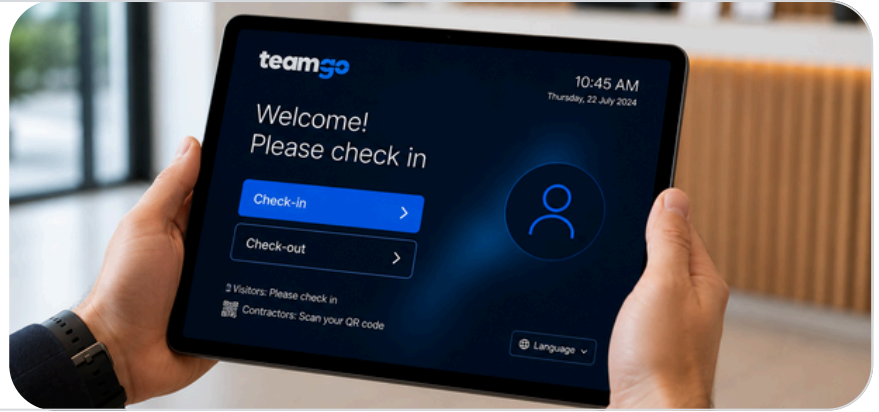

Use this checklist to compare solutions and make the right decision for your organisation

Quick win improvements

Even small changes make a big difference

Replace paper logs with digital check-in

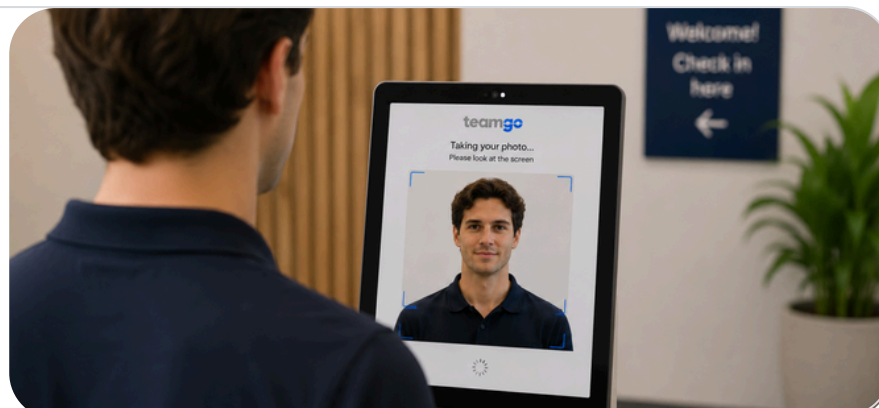

Add instant notifications to staff

Use QR codes for repeat visitors

Enable photo capture for identification

Ready to take control of your front desk?

Get full visibility, improve compliance, and create a better visitor experience without the hassle.

Stronger Security

Better Compliance

Save Time & Money

Happier Visitors
